

Are you looking for new ways to manage your media in a more efficient and easy way?  
 Do you have concerns related to data privacy/security?  
 Or do you need to simplify the process around managing the media in your company?

## THE FLOW ANT IS YOUR SOLUTION

Flow Works introduces a next generation Media Asset Management system that allows you to manage your media throughout the whole media lifecycle – complete ownership and control from production to archive. **Fully GDPR-DSGVO compliant.**

## THE ONLY COMPLETE SOLUTION FOR MANAGING YOUR MEDIA

The Flow Ant offers you all the features you need to manage your media throughout its lifecycle. You can ingest, archive, manage, collaborate online, handle automation and workflows, distribute as well as integrate to cloud or social media. Since the media is stored on the Flow Ant micro server, you have full ownership of your media, eliminating issues with data protection. Take full control of your media management and step up the game with the Flow Ant!

## AFFORDABLE PROFESSIONALITY

Derived from the broadcast market, the Flow Ant is a revolutionary Media Asset Management system that gives you the functionality of a large-scale professional Media Asset Management system in a compact and affordable format. Compared to online service providers or cloud platforms, the Flow Ant offers you full ownership of your media without the risk of data protection issues as well as independence from any other system/solution and unlimited media asset management.

## THIS IS HOW IT WORKS

The Flow Ant is a powerful but compact micro server with built-in Flow Center media management software. This small-sized product contains all you need to manage all your media throughout its lifecycle. You access and manage your media that is stored on the Flow Ant through the web-based graphical user interface.

## WORKFLOW AND SOFTWARE MODULES TO DOWNLOAD

Want to integrate 3rd party software? Want to add social media channels for distribution? Need reporting or quality control systems? Is there a web service you need to integrate? Simply go to our website and download software integration modules easily.
