

# News production with your smartphone – be faster!

When we talk about news production, the most important is time!

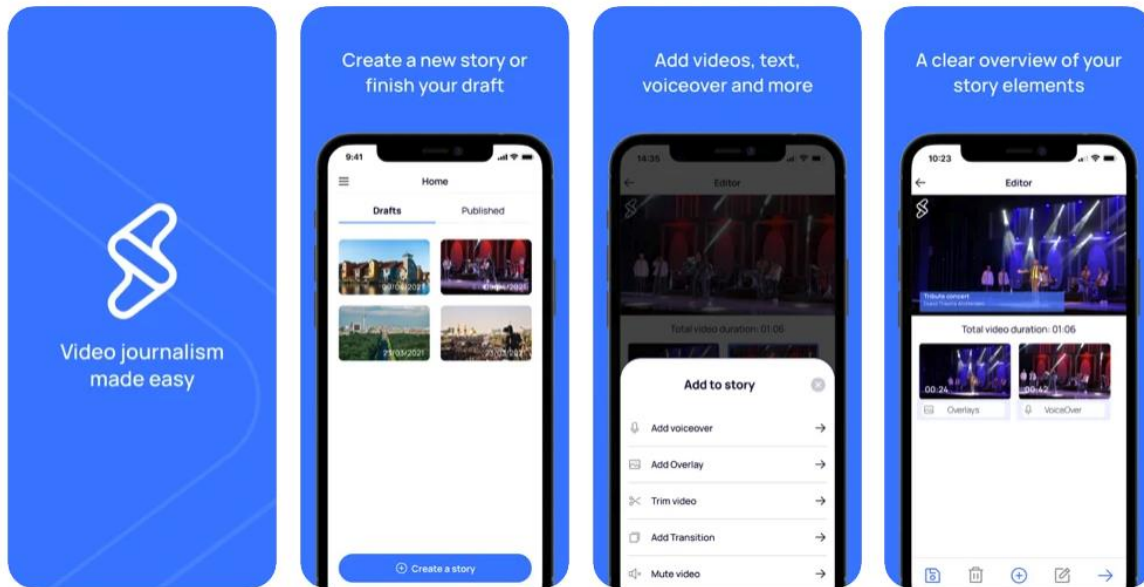

As a mobile journalist you are there where the news are happening. You do know how to build a good story. But you are still looking for a simple and feature-rich app to produce professional video?

*News from yesterday are old news!  
Be the first telling a story by fast story creation & editing.*

No problem, we are happy to help. Let's get started!

- Take your smartphone
- Produce some short video clips:
- Put everything together with our #yourstoryz app
- Add lower third, or title's within the app
- Produce your own voice over
- Add some metadata information to your clip

**That fast you are ready to publish – easy, fast and simple!**

With the [YourStoryz](#) app you can combine clips, you shot with your phone to one story. You can add titles, headlines (lower thirds), voice-over, transitions, and you can trim long clips to the essence. Not in a big application, but simply in the app on your phone.

Once you have created and edited the video (usually in minutes) you can check it in a preview and that fast you are ready to publish.

Publishing to socials or websites requires a short description. This helps that your story is easily indexed by search engines. Easily add this in the app. Once you've done that, you are ready to go!

Publish to **Facebook**, **Instagram**, **LinkedIn**, your **website**, your **newsroom system**, **MAM**, **PAM**, **INGEST** tool, or just login to <http://dashboard.yourstoryz.com> and use our archive for further processing.

## Your personal or company styling

The [YourStoryz](#) backend allows to setup your company details. Once setup right, your logo, house style colors and more, it is automatically added to every video you create. This saves you a lot of time, and keeps styling in the video consistent to your brand style guides. (e.g. for #branded content)

YourStoryz offers even the possibility to add pre and post rolls. This helps you to create a even higher engagement with your audience and spread your message.

## Appearance

### Logo

Change

### Overlay (lower-3rd) background color

### Overlay title color

### Overlay sub-title color

### Pre- & post-loader

The pre- & post-loader are fragments that are shown at the beginning (pre) and at the end (post) of your videos. Make sure the files you upload have the dimension 1920px x 1080px (1080p).

## Example

## Invite guest reporters, and team members within your account

Send invite

Role

E-Mail Address

Send invite

The [YourStoryz](#) platform allows you to invite other creators to your company account.

- ? Would you like your e-commerce customers to send you a unbox video?
- ? Are you offering explanation intense products? Ask your user to share videos of them using it.
- ? Is there a community that uses brands like yours? Ask them to contribute with video of your product in action.

### Invite them - it's free!

They become your content creating crowd, providing you with firsthand content of your ambassadors, reporters, fans, or clients.

This is exactly what you've been looking for?
