How
it works

Automate ingest and outgest workflows

IN2IT exchange executes **import, export and transfer** tasks from and to any **local, remote or cloud-based environment.**

Configure **sophisticated workflows**, easily. Deliver to **multiple targets simultaneously**. Get an accurate view of the ongoing processes and tasks. IN2IT exchange **notifies you** when and where its needed.

Make your content available to any user or viewer

IN2IT exchange is already integrated with numerous MAM platforms, storage solutions, filesystems, transfer accelerators and social networks.

Implement **your own business rules** and rely on a powerful media and metadata processing engine.

Your content is available **on time** and **in the right place.**

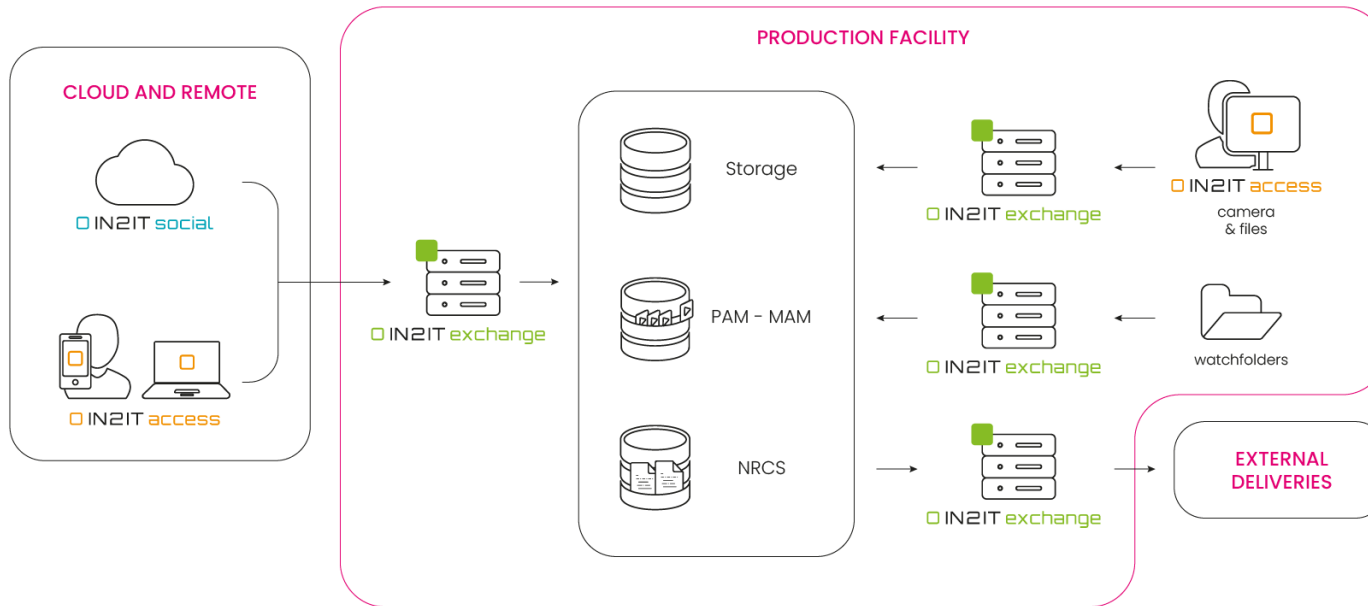

Gear up for the future

Build a **reliable** infrastructure you can trust. **Scale it as your needs grow.**

IN2IT exchange is designed to manage **24/7 operations** and **high volumes** of processed content.

Use the **API** to build your own integration and get more from your IN2IT platform.

EXTERNAL DELIVERIES

IN2IT

Discover what a user-centric, game changing technology can do for you.

All IN2IT solutions rely on a **flexible workflow engine** specifically designed to handle **media processing tasks.**

Seven years of development have resulted in **multiple connectors and workers for smooth integration** with industry-leading solutions.

IN2IT solutions are **easy to configure** and just as easy to use, empowering engineers to **build complex workflows in a short period of time.**

AMAZING KEY FEATURES

- Scalable, highly available architecture
- Multiple PAM/MAM/NRCS integrations
- Cloud watchfolders and delivery
- Side-car and external metadata support with custom naming conventions
- Newswire ingest workflow

- Combination of manual and automated tasks with IN2IT access
- Edit while ingest
- REST API
- Cloud or on-premise deployment

Technical specifications

IN2IT exchange is a scalable server solution that can be deployed on physical or virtual environments. Please refer to IN2IT access documentation to learn more about client-server deployment.

Supports all commonly used sources

> Video, audio and graphic files
> Camera cards
> Metadata only
> Side-car metadata
> Avid PAM assets and AAF

Recommended System

> 32 Gb RAM
> 1 or 2 x CPU Intel® Xeon® Gold 6132 2.6 GHz 14 cores*
> 2 x SSD 480 Gb RAID 1 for system
> 2 x HDD 900 Gb 15K RPM SAS RAID 1 for temp files
> 1 Gb or 10 Gb network connection to storage
> Windows Server 2019 - Virtualization is supported

* Required CPU resources may vary depending on source, target formats and transcoding options.

Virtualization of IN2IT exchange

> 1 GbE connection per Woody VM
> 10 Gb storage connection on hosts
> 12v CPUs minimum per Woody VM
> 32 Gb RAM

Ingest modes and delivery protocols

Processing modes: Avid Media, A/V File, metadata only
MAM and cloud integrations: Avid MediaCentral, Avid iNews, Dalet Galaxy, Grass Valley Stratus, Google Drive, Dropbox, Azure storage, Amazon S3, Busby
Delivery protocols: FTP, SFTP, FTPS, SMB, Aspera FASP, FileCatalyst, Signiant

Supported target formats

Broadcast formats: AVC-Intra, Avid proxy, DV, DVCPro HD, DNxHD, DNxHR, IMX, JFIF, XAVC Intra, XDCAM EX, XDCAM HD
Custom formats: h.264, h.265, Mpeg2, audio only

IN2IT embedded workflow engine

> Metadata transformation and mapping
> Content delivery to multiple destinations
> Advanced user management
