

## x-dream Media Suite xTranscode

**xTranscode** is a general-purpose transcoder product for file-based production workflows. Its build-in transcoding engine supports many source formats and lots of target formats in post-production, archiving, broadcasting, streaming and social media.

**xTranscode** provides highest quality audio and video processing and encoding at highest speed. Its download and upload services are adding fetching source files and delivering target files as enabler for efficient workflows. Notifications are completing the feature set with system and operator support.

### Use case

#### File Transcoding at

- ❖ Post-Production
- ❖ Archiving
